

Building better futures
for children with disabilities

Speaking and Listening

This is for parents to help their child communicate through expert programs.

At Noah's Ark, we have a large team of Speech Pathologists across Victoria and the ACT that are certified to deliver a range of specialist speech programs from The Hanen Centre in Canada. Our Key Workers can help your child communicate and have experience in planning, delivering and evaluating effective programs.

These programs:

- Identify your child's social and communication skills
- Develop realistic and appropriate goals
- Use everyday routines and play activities to build your child's social and communication skills
- Increase your child's motivation to communicate, play and make friends.

Hanen Programs® that Noah's Ark provides are evidence based and family centred. We share language intervention strategies that can be used throughout your family's every day activities and routines. The strategies focus on the interactions your child has with their family. High quality Hanen resources are also provided.

Our Speech Pathologists have expertise in Augmentative and Alternative Communication.
